

PROBLEM

Wastage of time when serving meals

Students tend to waste a lot of time when taking their various meals and they interfere with the lessons hours. This is caused by lack of organisation on the students part when lining up and others also come late for meals.

Problem statement:

How might we adopt a tool that will enable students manage their time during serving meals so that they can start their classes in time

Impact

After solving the problem of time wastage during meals time,the students will be able to start their classes and even their personal studies in time,that will help them perform better in class.

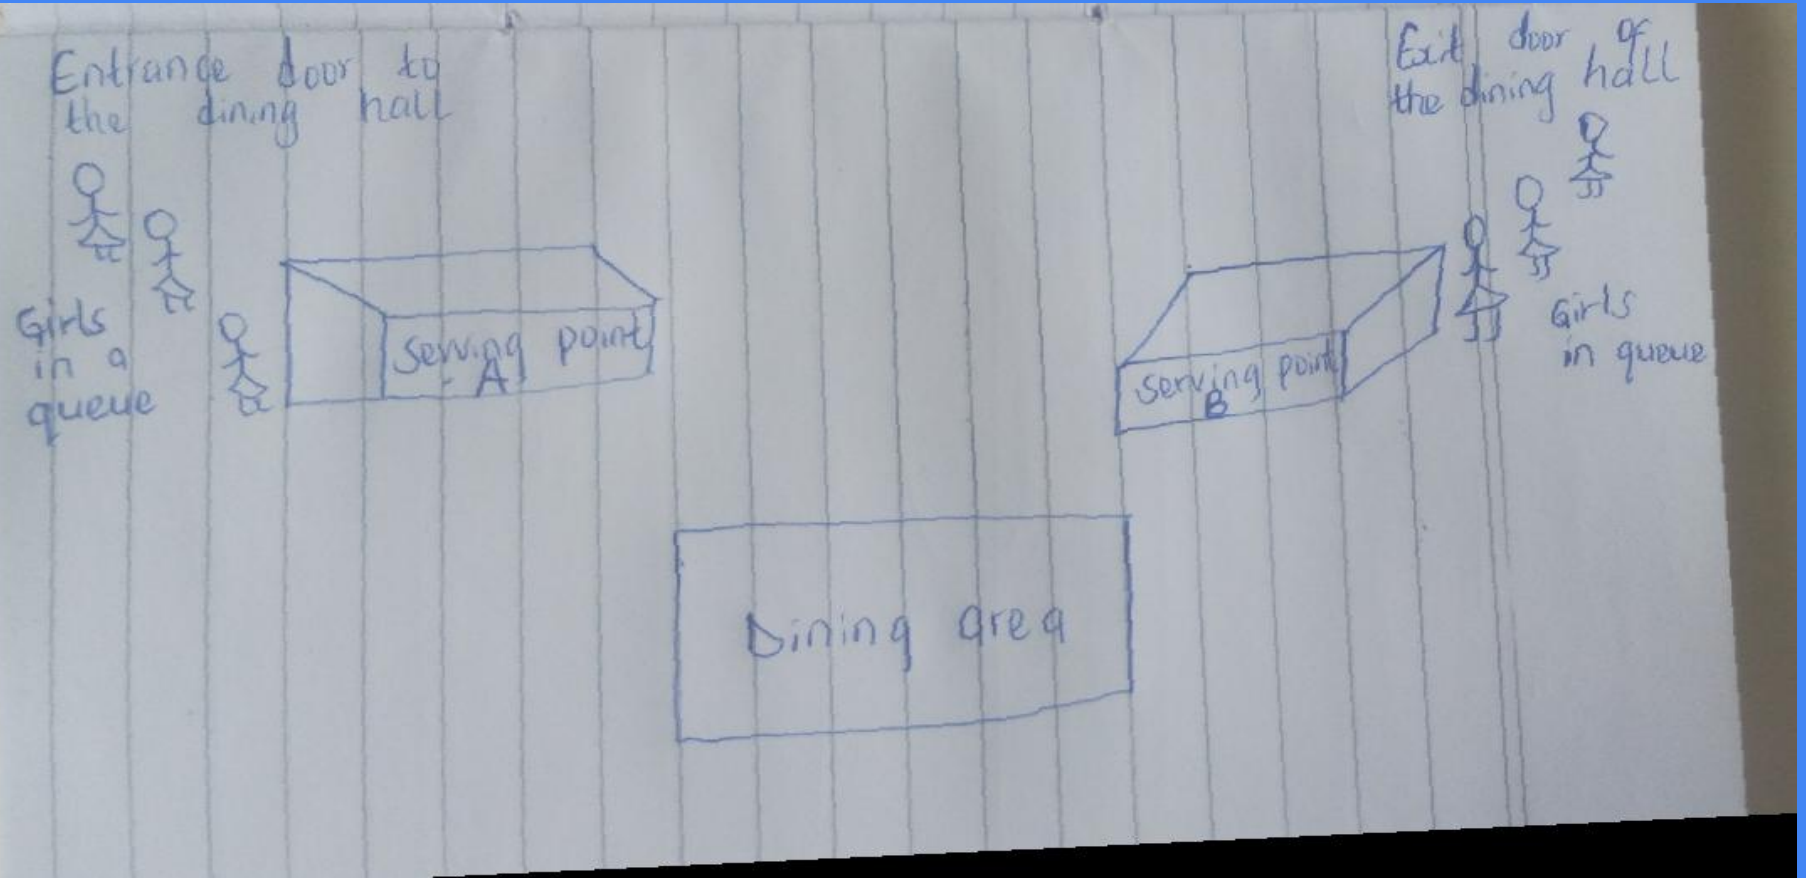

A close-up photograph of a person's hand holding a purple marker, drawing on a whiteboard. The background is blurred, showing what appears to be a classroom or meeting room with other people and lights.

The solutions

- ❖ Having different serving points
- ❖ Voice notes alarms/reminders in the dinning and classrooms reminding students it is meal time
- ❖ Serving in turns
- ❖ Early preparation of food before meals time

SKETCH FOR SOLUTION ON DIFFERENT SERVING POINTS

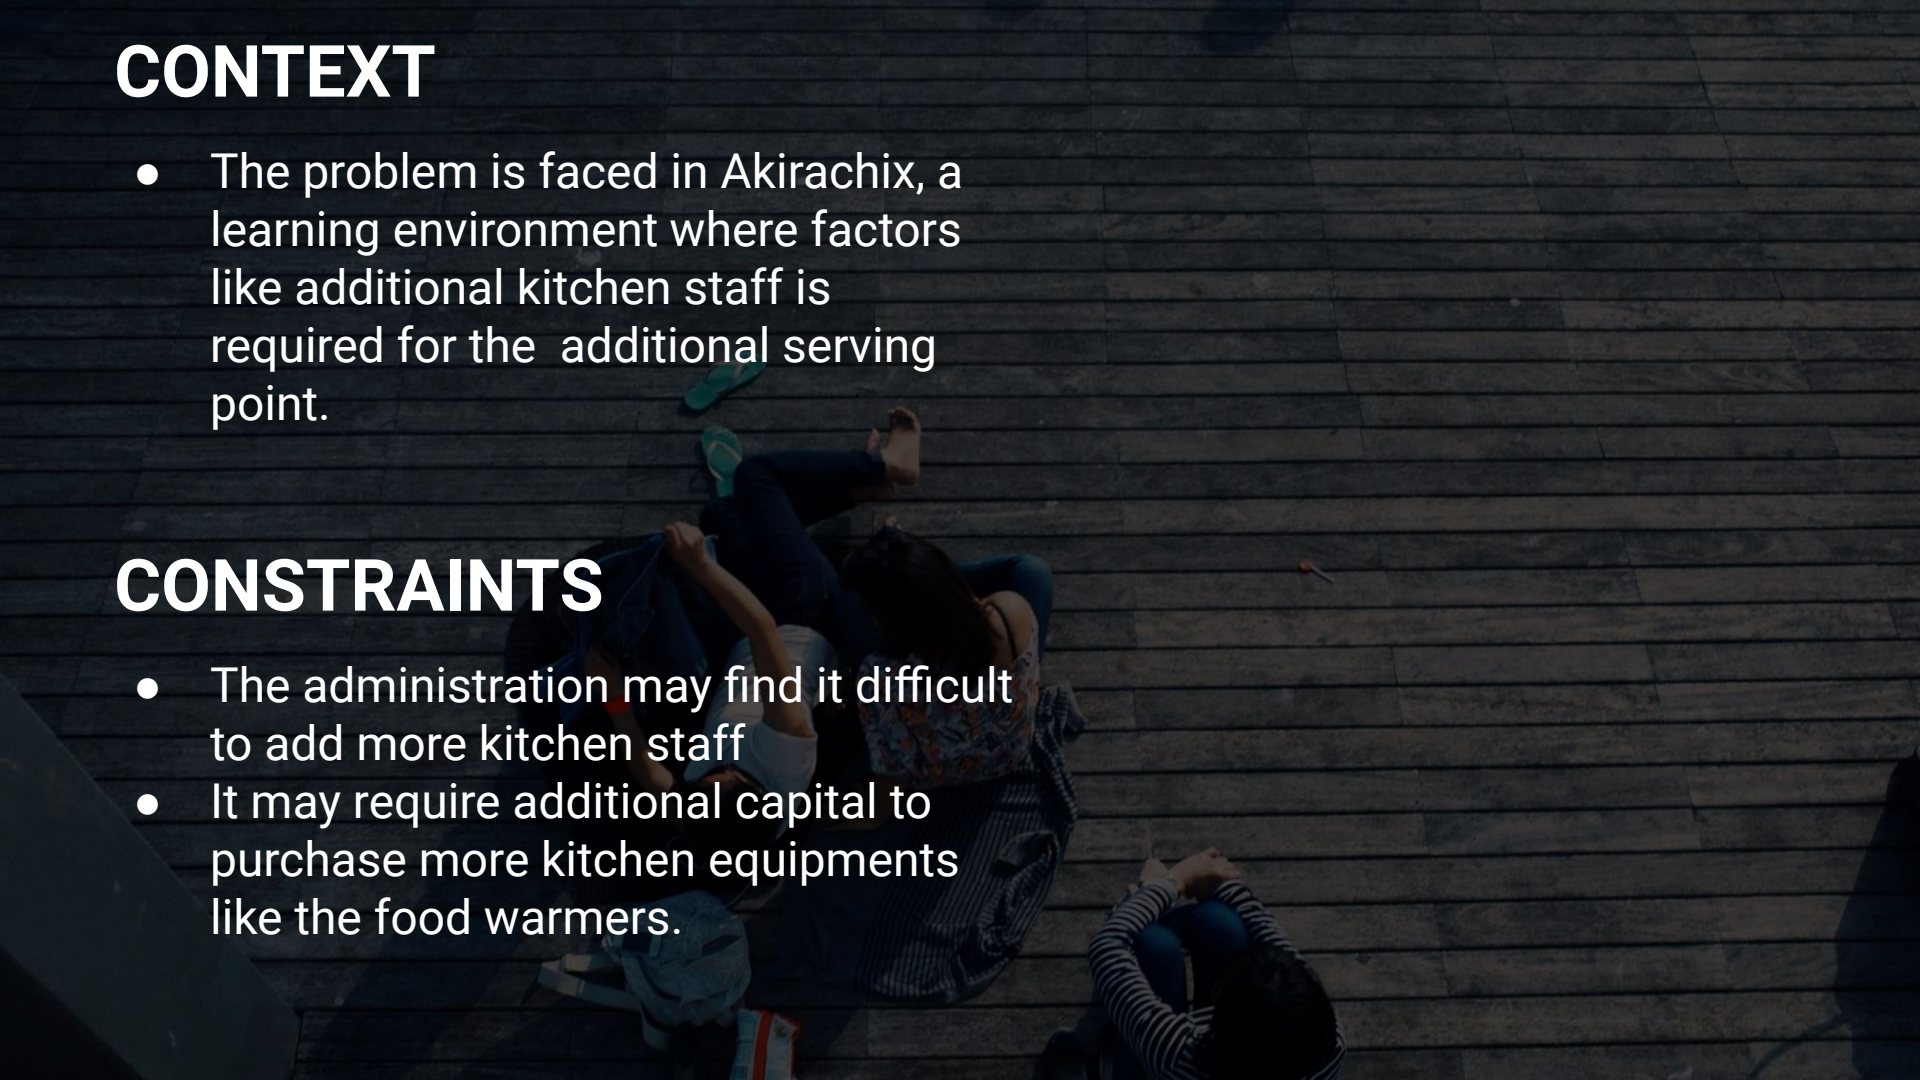

CONTEXT

- The problem is faced in Akirachix, a learning environment where factors like additional kitchen staff is required for the additional serving point.

CONSTRAINTS

- The administration may find it difficult to add more kitchen staff
- It may require additional capital to purchase more kitchen equipments like the food warmers.
